SUPPLEMENTARY INFORMATION:

I. Abstract.

Section 4 of the Endangered Species Act (ESA) (16 U.S.C. 1531 et seq.) specifies the process by which we can list species as threatened or endangered. When we consider whether or not to list a species, the ESA requires us to take into account the efforts being made by any State or any political subdivision of a State to protect such species. We also take into account the efforts being made by other

entities. States or other entities often formalize conservation efforts in conservation agreements, conservation plans, management plans, or similar documents. The conservation efforts recommended or called for in such documents could prevent some species from becoming so imperiled that they meet the definition of a threatened or endangered species under the ESA.

The Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE) (68 FR 15100) encourages the development of conservation agreements/plans and provides certainty about the standard that an individual conservation effort must meet for us to consider whether it contributes to forming a basis for making a decision about the listing of a species. PECE applies to “formalized conservation efforts” that have not been implemented or have been implemented but have not yet demonstrated if they are effective at the time of a listing decision.

Under PECE, formalized conservation efforts are defined as conservation efforts (specific actions, activities, or programs designed to eliminate or reduce threats or otherwise improve the status of a species) identified in a conservation agreement, conservation plan, management plan, or similar document. The development of such agreements/plans is voluntary. There is no requirement that the individual conservation efforts included in such documents be designed to meet the standard in PECE.
